

# Focus on sustainability

Celebrating a key sustainable milestone - 10 200 tree seedlings planted!

**As we near the end of another year, we are thrilled to announce that we have surpassed our target of planting 10,000 trees over and above key sustainable initiatives that we have been pursuing.**

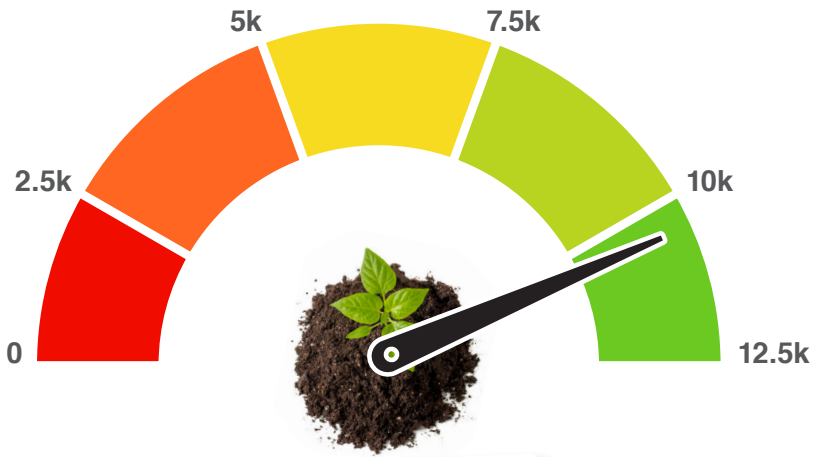

**This significant milestone aligns perfectly with our core purpose of improving lives through service. We appreciate all stakeholders who have helped us to attain this target including Allied Timbers.**

Trees, as we know, are not merely botanical wonders; they are the lifelines of our planet. They provide sustenance, purify the air, and offer shelter to countless creatures. By planting these 10,200 trees, we have taken a significant step towards a greener, more sustainable future.

Our commitment to environmental stewardship is deeply rooted in the United Nations Sustainable Development Goals (UNSDGs), which emphasise the importance of green energy and the preservation of our natural world. Today, we celebrate this achievement as a testament to our dedication to these principles. Well done team ZBFH and all our stakeholders who played a key role. As we move forward, ZB Financial Holdings remains steadfast in its commitment to environmental sustainability. We will continue to plant more trees, promote eco-friendly practices, and contribute to a healthier planet for generations to come.

**Together we can create a greener, more sustainable future!**

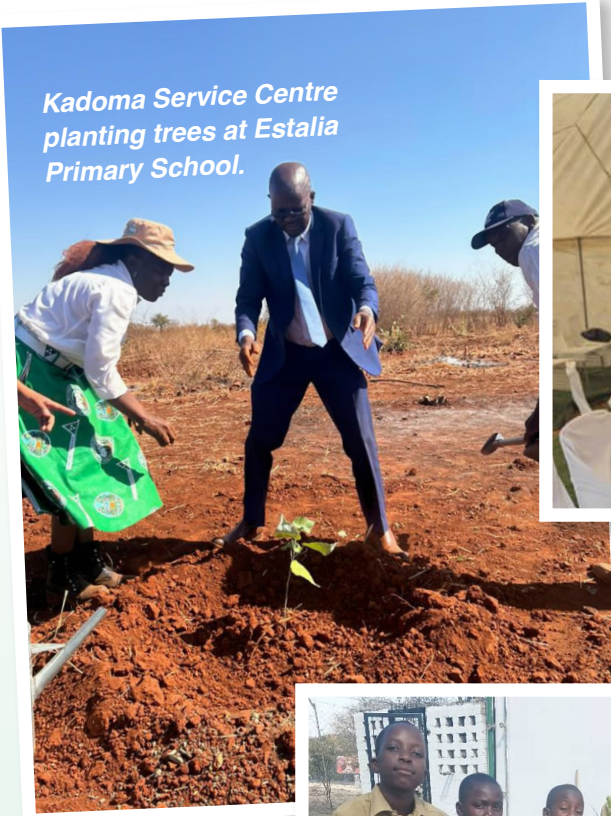

# Number of trees planted:

There was an achievement of planting

**10,200 trees,**

surpassing the target of 10,000 trees. This is a positive outcome, indicating that the planting initiative was successful and exceeded its goals by **200** trees.
